

VLC · WINDOWS PC

Watch ViewerFirst with VLC on Windows

3 steps · about 5 minutes

Before you start

- Your **M3U link**, from your ViewerFirst email
- Your Windows PC, connected to the internet
- About 5 minutes

01 / 03

Install VLC

Download VLC from its official website, **videolan.org**, and install it. It's free.

02 / 03

Open your ViewerFirst link

In VLC, choose **Media > Open Network Stream**, paste your **M3U link** from your ViewerFirst email and click **Play**.

03 / 03

Pick a channel

Open **View > Playlist** to see all your channels. Save them with **Media > Save Playlist to File** to reopen them in one click.

Good to know

- VLC uses your M3U link only. It doesn't support Xtream Codes logins.
- VLC has no TV guide. For a guide with programme times, use IPTV Smarters or TiviMate on a TV device.
